

FiberWeld - for a Lasting Bond

For Immediate Release
Seattle, WA - Nov. 2008

Westech Aerosol announces FiberWeld, an efficient and cost effective spray adhesive cylinder system for bonding duct liners and HVAC sheet and roll insulation, as well as other materials. With high temperature resistance and non-flammability, FiberWeld allows contractors to quickly and easily do their jobs, providing a fast acting bond for many applications. Join us at booth #6388 for samples and more information.

Westech is located in Port Orchard, WA, and has been a leader in adhesives that take into consideration the stringent California requirements and still deliver excellent performance to the OEM. To find out more about Westech or our products contact: jdownes@ok2spray.com or call 877-674-2010.
