Security™ Chimneys Unveils New Product at AHR EXPO®

CIX offers lightweight, easier-to-install alternative to competitors' commercial venting products

LAVAL, Québec, Canada (Dec. 3, 2008) – Security Chimneys is launching a sturdy but lightweight commercial chimney that offers several key advantages over competitive venting systems. The Secure Stack™ is a versatile new product designed for easy installation across a wide range of applications and will be showcased at the 2009 AHR EXPO in Chicago.

Secure Stack is a double-walled, two-inch-insulated commercial chimney available in diameters from five to 36 inches. It utilizes a thicker gauge material for its inner pipe, which provides a stronger and more rigid assembly. Its strong stainless steel inner flue and outer casing is lighter weight than similar products and its components line up easily and quickly, which simplifies installation.

“This product is designed to compete head-to-head with any other commercial chimney on the market,” said Eric Dufour, Security Chimney’s marketing director for research and development. “It meets all existing standards and can be specified for multiple applications.”

Secure Stack’s couplings are completely welded to the inside flue pipe allowing the extended inner flue to be sealed outside the pipe’s exterior casing, which reduces temperature at the sealing location. Installation is further simplified because the joint sealing is needed only on the coupling’s flange and no inner band is needed.

-more-

The CIX meets U.S. UL-103, 60-inch WC positive pressure, 1400 F chimney, Canadian ULC-ord959 and Canadian ULC –S604 chimney and Grease Duct UL 1978 standards. The CIX will be on display at Security Chimney's booth (#1050, North Hall).

About Security Chimneys

Based in Laval, Québec, Security Chimneys, a division of Lennox Hearth Products, provides an extensive range of safe, secure, and scientifically advanced chimneys and venting systems for residential, industrial and commercial applications. Products for the residential hearth and home-venting markets, offer economical, energy-efficient solutions to keep homes warm during the winter. The industrial and commercial line features four highly engineered chimneys for factories, schools, institutions, and commercial applications. For over 40 years, Security Chimneys has re-affirmed its commitment to total quality by researching and developing new products and services that exceed customers' continually evolving expectations. Security Chimneys is a division of Lennox Hearth Products.
