

## **AtmosAir Featured in Extreme Makeover: Home Edition to Bring Healthier, Cleaner Air to a Family in Georgia**

May 17, 2010:

Clean Air Group, Inc. recently joined forces with ABC's TV show Extreme Makeover: Home Edition and Energy Savers of Georgia, a progressive HVAC contractor in the Southeast, to improve the lives of a family living near Columbus, GA.

The family of four will see their home in Pine Mountain Valley, GA enhanced with many improvements, benefitting their wellbeing significantly. The father suffers from Lou Gherig's Disease, while his son is afflicted with Spina Bifida.

Clean Air Group, of Fairfield, CT, has provided an AtmosAir bi-polar ionization air purification system, with Energy Savers of Georgia providing the installation labor.

The AtmosAir system is designed to help significantly break down or remove all the indoor airborne contaminants that could negatively affect the family's health, such as dust, pollen, allergens, off-gassing of VOCs, mold, mildew, and viral or bacterial pathogens.

The family and its renovated home was featured on ABC's Extreme Makeover: Home Edition on May 16<sup>th</sup>, 2010

### About AtmosAir™ Solutions

AtmosAir's Bi-Polar Ionization technology restores to indoor environments the same clean, pure air quality typically only found at higher mountain elevations.

AtmosAir™ systems remove ALL major contaminants such as dust, pollen, allergens, unpleasant odors, off-gassing of VOCs, pet dander, mold, bacteria and viruses, and provide almost instant relief to allergy and asthma sufferers.

AtmosAir™ products are designed for application in homes, apartments, schools, hospitals, offices, hotels, athletic facilities, locker rooms, and other residential, commercial and industrial applications where indoor air quality is important, as well as reducing HVAC-related energy consumption.
