FOR IMMEDIATE RELEASE**ENERGY MANAGEMENT COMPANY ANNOUNCES NEW PARTNERSHIP***Partnership debuted at the January AHR Expo in Orlando, FL*

LEE'S SUMMIT, MO. (January 7, 2010) – Lynxspring will debut their new partnership to the Air-Conditioning, Heating and Refrigerating industry on January 25th in Florida. During the AHR Expo, this growing, Missouri enterprise will announce their new, ground-breaking collaboration, which has been in development for over a year.

“We are pleased to announce our new alliance with eSight Energy,” said Terry Swope, President of Lynxspring. “This partnership is designed to bring high-value services to our customers, and to the end-users, as well. By using our state-of-the-art building automation, this alliance will help further energy management for a multitude of applications.”

Lynxspring's collaboration with eSight Energy began in early 2009 and is designed to provide building management integrators with a new service offering. Namely, a state-of-the-art web-based, energy monitoring and targeting package. This comprehensive and intuitive energy management suite provides an extensive range of techniques for managing all aspects of energy data. Through use of eSight, building management integrators can enhance their position as a trusted advisor to their client base.

“We are delighted to announce eSight Energy's partnership with Lynxspring,” said Janie Jefferies-Freer, VP of Sales for eSight Energy. “Together, we are able to offer an extremely sophisticated solution encompassing building automation, energy management and significant utility cost reduction.”

Lynxspring, founded in 2001, is a leading technology company addressing building automation control requirements with a focus on interoperability. “Lynxspring manufactures and distributes web-enabled, open protocol control solutions to fit the simplest to the most complex criteria building owners expect in today's market,” said Swope. “We believe that the intelligent use of both unique and third-party software products can increase quality assurance, productivity and repeatability in any market that uses an integrated approach in design, development and deployment of products and services.”

During the AHR Expo, slated to take place at the Orange County Convention Center, Lynxspring will have live demonstrations at their booth, and representatives from eSight Energy will be present, as well.

About Lynxspring®

Lynxspring's technologies extend connectivity, integration and interoperability to the millions of devices deployed in the market today, and empowers the development of intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets. Today, there are multiple partners operating throughout the United States, Canada and Mexico installing applications that include: energy and sustainability management, intelligent building automation, M2M, security automation, lighting control, convergence retailing and smart facilities management.

Using Tridium's NiagaraAX software in an embedded platform, Lynxspring manufactures and distributes JENESys™, an Internet-based integration and interoperability open modular platform, combining automation infrastructure technology and device-to-enterprise integration solutions. About eSight Energy

Brought to you by eSight Energy, Inc. eSight is the most sophisticated and comprehensive energy management suite available worldwide. Utilizing 100% web enabled technology, eSight offers an extensive range of techniques for analyzing energy usage and targeting sites to make significant energy and cost savings. The suite may be accessed over the internet, or installed to site and accessed over the local network.

eSight may be used to monitor data from virtually any energy related system including meters and loggers, building management and control systems, production data, and data from any fuel type including electricity, gas, water, steam, compressed air, temperature and more. eSight fully integrates with Tridium's NiagaraAX software and the Lynxspring JENESys™ platform.

eSight combines powerful techniques for understanding energy usage and targeting specific areas for reductions, with an exceptionally intuitive user interface. Already in use worldwide, eSight is available in a wide range of languages and currencies. www.eSightenergy.com.
